

Post-modern doubles: What's It All About?

Disrupt! Disrupt! Disrupt!

Player A serves from the center, i.e. singles position. Path of serve is orange. Returner B hits either dtf or inside out – the blue lines. Smiley face (her netman) has to move only one or two steps to cutoff the ball – this is why she is smiling! Learn this and you will smile too!

Look what happens when the serve goes out wide: red. Smiley face has way too far to move to cover the dtl return: green line from returner B.

Serving placement is key!!
